

## **Why Car Thieves Have Good Reason to be Worried About This GPS Tracker**

Autotrack is a highly effective, low cost GPS tracking device that is helping to cut the number of car thefts and increasing recovery of stolen cars.

A car thief might be determined to steal your car but at least if your vehicle is fitted with an Autotrack, you can quickly find it and get it back.

The Autotrack is small enough to discreetly hide in numerous locations inside or outside any vehicle. Download the 365 GPS app for instant tracking.

Most GPS vehicle tracking devices are expensive so the Autotrack is a welcome and affordable option to tracking your car. Car theft has increased by 50% over the last 5 years, with around 750,000 reported stolen in the US in the past 12 months. Can you really afford to lose your precious car?

## **Why Autotrack is much more than a simple vehicle tracking device**

Autotrack was designed as a GPS car tracking system, which can also be used to track other vehicles such as trucks or motorcycles. It can also be used to track your luggage. By placing the Autotrack into your suitcase you will always know where your luggage is at any time. However, consider your children who can go missing or get lost during special events. Any parent who has ever lost sight of their child on a crowded beach will know only too well just how worrying this situation can be.

## **Very simple to use, no recurring fees and packed with useful features**

The Autotrack mini GPS tracker uses Google maps and is extremely easy to use. Once in position, simply open the app and the GPS system will display the exact location of your device. Real time positioning updates can easily be set for every 30 mins up to 120 mins. It also has a powerful memory feature, which is able to store up to 365 days of tracking history. A fully charged battery will keep the device working for 7 - 10 days and there are no fees for downloading and using the app.

## **The most versatile, reliable and cost effective GPS tracker available**

The Autotrack GPS tracker is proven to be one of the most versatile and reliable tracking devices available for the price and will work in virtually any country. It's positioning is extremely accurate and totally reliable. It can be used as a vehicle tracker for any type of vehicle or as a personal tracking device, providing additional security for yourself or any close family member. It's easy and straightforward to install and above all, it offers complete peace of mind and reassurance.
