

Smart Language Translator

Smart Translator Lets You “Speak” Up To 39 Languages At The Touch Of A Button

This incredible device used to be only available to foreign diplomats, world leaders and international business people who needed an effective translation tool.

Now anyone can quickly break through multiple language barriers and easily communicate in 39 different languages without having to learn a single foreign word.

Being unable to understand what someone in authority, and from the other side of the world is saying to you, could get you banged up in a foreign jail.

That’s exactly what happened to two young guys from England. John and Steve had just graduated from Oxford University with top class medical degrees and decided to take in a tour of the Far East before beginning their gruelling studies to become specialist doctors. They set off and made their way across Europe and crossed the border from Belarus into Russia.

After spending just 48hours in Moscow they ended up in the hospital.

John and Steve got into an argument with some locals in a bar and a fight broke out. They were taken to the nearby hospital but being unable to speak the language they were not able to explain to doctors about what had happened or how much pain they were in. Subsequently, they were simply discharged with a large tub of basic painkiller pills. From that point, someone was following and watching them so they decided it might be better for their health if they quickly passed through Russia, as it was obvious the people didn’t like English tourists.

They didn’t expect Chinese border guards to search their luggage

Next day, they boarded the trans-Mongolian train, which was to take them across the border with Mongolia on their way to visit China and “The Great Wall”. The journey to Sainshand in Southern Mongolia was quite uneventful but it was a very tiring 7 days of mostly train travel. Finally, when they arrived at the Chinese border, several uniformed patrol guards unexpectedly boarded the train and asked to see passports and they also searched passenger’s luggage.

The next part of the journey was the start of something absolutely terrifying

When they got to John and Steve they found the large tub of painkillers in John’s rucksack and assuming they were illegal drugs the pair were arrested. They spent the next 10 days locked up in a rat infested Chinese prison with murderers and rapists, protesting their innocence. If only they had this essential instant translation device with them. They could have easily explained the whole situation and enjoyed their visit to China without incident.

Summary

- **Realtime, instant 2-way voice translation with 99% accuracy**
- **Very light and portable with long battery charge time**
- **Bluetooth compatibility with all smartphones via a free downloadable app**
- **Full 60-day warranty**

Quote #1

"I used it for the first time on vacation in Japan and it worked amazingly well. I'll take it with me every time I go overseas on vacation or on business."

Quote #2

"Wow! This little device got me out of a whole lot of trouble when I was involved in a car accident in Turkey. It wasn't my fault but the local police took some convincing."

Quote #3

"I bought my smart translation device for business use as I am always away in Singapore or Thailand. I found it incredibly helpful in communicating with the local people."

Pros

1. Easy to transport in a pocket or purse
2. Quick charging and long battery life
3. Translates 2-way for 39 languages
4. Perfect for vacations and business users

Cons

The only color option is gray

We would never visit another foreign country ever again without a Smart Translator Device
