Professional Digital TV Installation Service & Flat Screen TV Set Up

We can provide a wide range of **Digital TV Set Up & Installation Services** for both private and commercial customers throughout the UK. We are fully experienced in the installation of all types of digital TV equipment including flat screen TVs, plasma screens, LCD, LED and 3D TVs of all makes, models and sizes. All our digital Installation services include connecting your TV to the aerial or satellite and any other auxiliary equipment such as SKY TV, BluRay and Games Consoles.

For your convenience our expert AV engineers will tune in all available TV channels, set up smart TV features, tidy up all the interconnecting leads and provide a full demonstration of your new home entertainment equipment. We encourage you to ask any questions whatsoever about our TV installation service at this stage to ensure you fully understand how everything works.

A full **12 month installation warranty**, covering both equipment and fitting, is provided with all our Installation Services. For your peace of mind, AV Installs Ltd is a **Trading Standards Buy With Confidence Member**.

Flat Screen Installation Services

Our Basic **Flat Screen TV Set Up Service** is best suited for customers who have recently purchased a new digital television and need some assistance with unpacking, setting the TV up and connecting to any other existing auxiliary audio visual equipment. We will also ensure all connecting cables are hidden from view where possible. "No more untidy cables". [Click here for more info](#)

Our Standard **TV Mount Installation Service** offers a convenient low cost solution to TV wall mounting and comes complete with a surface mounted cable management system. This service is best suited for all types of TV bracket and wall mountings. [Click here for more info](#)

Our custom **Hidden TV Cabling Service** includes wall mounting your TV with the bracket of your choice along with a complete hidden cabling service. All interconnecting leads will be run in wall cavities or chased into solid walls, which

will then be re-plastered. The working area will be left clean and tidy on completion. [Click here for more info](#)

For larger projects such as multiple installations, multi room TV or for TVs in excess of 65 inch sizes, we provide a [Custom TV Mounting](#) Service. This service includes a pre-arranged site survey and consultation, and is designed for customers with very specific installation requirements.

For further information and details about our complete range of TV brackets, leads, floating AV shelf systems and many other installation fittings and accessories, visit our [Contact Us](#) page or call us directly on 0845 474 1476 <http://www.avinstalls.co.uk/tv-mount-installation-amp-cable-management-p-1.html>

TV Wall Mounting Installation Service

Our **AV Installs Standard TV Bracket Installation Service** provides an affordable solution for customers looking to engage a professional flat screen installation company. Included with this service is a complete cable management service. All interconnecting leads will be run in a surface mounted cable covering system, which is both convenient and visually tidy.

This service is best suited for wall mounting all types of flat screen TV including LED, LCD, Plasma and 3D TVs. Our expert audio visual engineers will assess the installation conditions and provide any advice you may require prior to wall mounting your TV at the agreed position.

We are able to wall mount any size TV to any type of wall including solid walls, cavity walls, stud walls along with dot and dab. We will also supply any specialist wall mount fixings as may be required to complete the installation. As you might expect, all our work is covered by a full **12 month installation warranty**.

More details...

Included with the TV Wall Mounting Installation service is a complete audio visual cable management solution. A strip of plain white trunking will be used to contain the leads that connect your TV to any other auxiliary devices. Alternatively, they can be bound in a black spiral cable loop for tidiness.

The trunking allows easy access, which provides more scope should customers wish to add further devices in the future. Next, all the auxiliary equipment is connected to the TV and all the interconnecting leads that normally get tangled up in a mess behind your equipment will be tidied up with cable ties and spiral.

After the wall mounted TV is set up and calibrated with the other equipment, our

engineer will provide a full demonstration of all the equipment and will be more than happy to help with any questions you may have relating to operating the system.

The Standard TV Wall Mounting Service is a **fixed priced service**, subject to a brief **free of charge telephone survey**. We will then follow up with an official email quotation together with our standard terms and conditions. For complete peace of mind, all standard installations come complete with a full 12 month installation warranty.

AV Installs is a **Northamptonshire Trading Standards Approved Buy With Confidence Member** and only employs its own qualified and highly experienced installation engineers, which are CRB checked.

We can also assemble any furniture or fittings that you may have purchased to house your auxiliary devices, or if required, we can also install floating AV shelves to house your equipment. We also supply an extensive range of AV Furniture and Floating AV shelves units with cable management. Contact us for further information.

AV Installs Professional TV On Wall Installation Service

The Custom TV on Wall Installation Service is best suited for all makes, models and sizes of flat screen televisions including LED, LCD, Plasma and 3D TVs. Our professionally qualified engineers will assess the wall construction type and provide the correct fixings, ensuring a safe and fully secure TV wall mounting. We are able to mount your TV to virtually any wall and conceal the cabling in almost any wall types including dot and dab, stud walls, cavity walls along with solid walls.

More details...

Included in the TV on Wall installation service is a **Hidden Cabling Solution** ensuring all the TV cables running from the TV screen back to your auxiliary devices are concealed within the wall. This provides a slick cable and trunking-free installation, which gives a seemingly floating effect to the TV, much like a wall hung picture. There are many solutions to hiding cables within walls and dependant on the wall type we can provide the most appropriate solution for you.

All cabling from the TV back to any other audio visual equipment will exit a plain white brush plate at a point agreed with the engineer. Next, all the devices will be connected to the television and all the interconnecting leads that normally get

tangled up in a mess behind your equipment will be tidied up with cable ties and spiral.

After the TV is fitted on the wall and all the equipment is connected, the engineer will demonstrate that your equipment is working properly and will be happy to assist you with any questions you might have relating to operating your home entertainment system.

The custom TV Wall Installation Service is a fixed priced service, subject to a brief **free of charge telephone survey**. We will then follow up with an official email quotation together with our standard terms and conditions. For complete peace of mind, all standard installations come complete with a full 12 month installation warranty.

AV Installs is a **Northamptonshire Trading Standards Approved Buy With Confidence Member** and only employs its own qualified and highly experienced installation engineers, which are CRB checked.

Flat Screen TV Lifting Mechanisms & Picture Lifts

AV Installs Ltd are enthusiastic about innovative ways to hide flat screen TVs and therefore supply a range of **Motorised TV Lift Mechanisms** from world leading manufacturers. Flat Screen Lifting mechanisms are used to provide a remote control motorised lifting action, which can raise or lower a flat screen TV from either a cabinet or from a ceiling void. In addition to this we carry a range of innovative lifting products, which offer many alternative ways of concealing a TV Screen to the traditional [Vertical Pop-Up Lift Systems](#).

We stock a comprehensive range of traditional **Vertical Flat Screen Lift Kits** from **Venset Lifts**, which are used for raising or lowering flat screen TVs from furniture or ceiling voids. **Venset Lifts** have a quiet smooth operation, controlled by either a manual switch or RF remote control, both of which are included in the installation.

AV Install's friendly and knowledgeable staff can provide you with all the technical assistance you might need with the **Venset** product line, ensuring you get the right lift for your flat screen TV system.

AV Installs is also a reseller of **Future Automation** products, who are the world leaders in innovative motorised TV solutions. New to our range is the **Future Automation UBL**, which is a revolutionary under-bed Flat Screen Lift System that robotically slides your screen out from under the bed, lifts the TV upright and

then raises the TV into the perfect viewing position. Another great addition is the low level chest lift, which provides another great solution to hiding your flat screen TV and is an ideal alternative to the **Bed End TV Lift**.

We cater for customers who require a custom **Flat Screen TV Lift** and we can also provide specific Mechanisms for much larger screens in excess of 70 inch and above. AV Installs has a lift for just about every possible application and offers expert free advice. So if you are unsure about what you are looking for please call us on 0845 474 1476 or contact us via our website contact form.

Pop-Up TV Lift Systems

We stock a comprehensive range of **pop-up TV Lifts** from the world's leading manufacturers such as **Future Automation** and **Venset**. We have a range of standard TV lift kits suitable for Plasma, 3D TV, LCD & LED and flat screen TVs of all sizes. Motorised Pop-Up TV Lifts are perfect for hiding a flat screen TV from sight when not in use.

The traditional application would be to raise and lower a flat screen TV from an item of furniture that has either been specially adapted or custom made. AV Installs has a TV lift solution whatever your lifting requirements. Our lifts can be used for Bed End Cabinets, desks, worktops, sideboards and tallboys for example.

AV Install's range of **Venset Pop-Up TV Lifts** operate within a single vertical stroke movement that can be used to either raise or lower your TV depending on your requirements. The **Venset** range is manufactured from high quality materials and components and is available at very affordable prices.

All products come complete with a 12 month manufacturer's warranty. These **Venset** Pop-Up TV lifts are suitable for all screen sizes up to 70 inch and up to 100 kg, with a maximum lift stroke of 100 cm.

Our premium range of **Future Automation TV lifts** are designed to offer our customers a little more than just a straight up and down lift. **Future Automation** are the world leaders in innovative TV Lifting equipment and have a range of lifts that offer further articulation once in the raised position. AV Installs can also supply custom TV lift mechanisms suitable for screens in excess of 65 inch or for innovative alternatives to the traditional pop-up lift.

If you require any assistance in selecting the correct TV lift mechanism please call our experts on 0845 474 1476 where we will be more than happy to run through all your options.
