

“When I was totally broke, nobody wanted to know about my sad life story but now...

Everyone Wants To Know How This 24-Year Old Fresh-Faced Newbie Made Over a \$1million in Less Than 14 Months, “Working” Just 2 Hours a Day... And So Here It is...

VIDEO

“I went from dead broke to millionaire in less than 14 months and I could have made much more a whole lot sooner, if I wasn’t so damn lazy.”

- **Are you sick and tired of living from pay check to pay check?**
- **Are you absolutely fed up to the back teeth of never having enough money to buy the things you really want?**

If you are, and you want to do something about it then you had better listen up because a **serious, easy money making opportunity** is about to explode within the next few weeks.

Only those who get in on this now will really benefit from this cash extravaganza, which might never be repeated ever again.

What am I talking about?

Hi, I'm Dylan Verma and I'm a millionaire. I'm 24 years old and I live in LA, California with my girlfriend Emily. And I'm very happy to tell you **I'm living the high life.**

photo

I never, ever imagined my life could be this good. I live in a classy penthouse and I own a luxury beach house in Florida. I drive a Corvette ZR1 and I own a Harley Davidson Cosmic Starship motorcycle... my pride and joy.

So why am I telling you all this?

Well, it's not because I want to brag about my wealth. I'm sure if you were a millionaire, you too would have many nice things right?

You would live in a nice house, drive the luxury car of your choice and take vacations to anywhere in the world whenever you felt like it.

Sure you would... and you would do many other things too like help out your family, donate to good causes and maybe help disadvantaged people get a head start in life.

So I'm no different to you... except I discovered a way to become very rich, very quickly... and you can too. Then you can do whatever the hell you want with your money. **It will be all yours to spend as you wish.**

First you have to get it but like everyone I meet now, you'll want to know how I got mine...

Now, before you begin thinking I might have had a helping hand in getting started or I already had money... that's not how it was for me.

This is how it was...

After I left High School, I somehow managed to get a place at the University of Phoenix in Arizona, where I was intent on doing a Math degree. I thought if I could major in math then I could get a really good job for life.

I thought maybe an accountant job or a teaching job would suit me. I was after all really good with numbers... if nothing else.

I just never expected so much work though, and I wasn't really happy at college. I just didn't fit in and... well, basically I'm a very lazy person so I gave up and dropped out of college half way through my 4 year course.

My parents were devastated and pretty much disowned me. **They didn't speak to me for almost a whole year!**

I still learned a heck of a lot of stuff though, which was to come in very useful a little later on down the line.

Okay, so next thing I find myself working in a Pizza Hut joint. Yeah... some big career move eh?

I waited tables and washed dishes, cleaned the floors and collected garbage. Yeah, like it was real fun job... and the pay was like \$5.65 an hour. Can you believe that! Five dollars and 65 cents... Jeeez!

I really struggled to live as I was renting a crappy little room for 120 bucks a week and after buying food and paying bills I had nothing left. Not even enough to buy a cold beer on a Friday night after work.

My life really sucked!

After a while I found a way to supplement my income by doing some gigs on a couple of freelance websites in my spare time. These freelance websites are packed with people from around the world, all scrambling to work for next to nothing. It's really quite pitiful.

I was creating spreadsheets, writing articles, doing accountancy type jobs, doing voiceover recordings and well just about anything that people were willing to pay me a few bucks for... within reason.

The extra money helped a bit but I was seriously falling into debt and I was becoming very depressed and unhappy... as you might imagine.

Life was passing me by...

Life was just passing me by and I couldn't see any way out of my situation. I was stuck in a rut with **no money, no prospects, no friends and no hope.**

Well, it was all my own fault I guess and I wouldn't blame anyone for thinking that.

Then one day, totally unexpected, something happened and everything changed...

I was at work clearing the tables when this gorgeous girl looked up at me and smiled. I've always been a bit shy around girls so I just quickly smiled back and carried on with my work.

Then she brazenly walked on over to me and started talking. She asked me whether I was happy in my work. You can imagine what I said to that.

Turns out she remembered me from college... Wow! How embarrassing. I kind of vaguely remembered her but couldn't place the face. I'm sure I would have, I mean she was really drop dead HOT. Anyways...

She told me there was a good job going at her office, if I was any good at figures and if I was interested. The pay was \$10 an hour.

It was a no-brainer. I told her I was interested and she said she would arrange for me to have an interview the very next day.

Her boss was a young wealthy finance broker and he was a really nice down to earth kind of guy with a good sense of humor. We hit it off right away and I got offered the job.

I started a week later.

My first task was to look over some invoices, which had been piling up for nearly 3 weeks, since their bookkeeper walked out. So, as I went through each invoice, I came across one for \$2000, which was payment for a Bitcoin purchase.

My first encounter with Bitcoin...

I'd heard about Bitcoin but didn't really know much else about it so I asked my new friend, Emily, who is now my girlfriend, if she knew anything about this invoice and where I should file it.

She said she had no idea what it was about and suggested I speak with Mike my new boss. Mike was out of the office with a client until late so I waited until next day.

Next morning, I asked Mike about the invoice and he said he had been advised to invest in Bitcoin by one his rich clients. He then went on to tell me he hadn't a clue what it was all about and didn't want to make a big financial commitment.

I remember thinking... Holy shit he thinks two thousand dollars is NOT a big financial commitment. That was more than twice what I was making in a month working at the Pizza Hut job.

He then asked me to look into the whole cryptocurrency thing and come back with some information that he could fully understand what he was getting into.

Like a loyal employee, I did as I was asked... and that was the start of something that was to change my life forever.

Now here's the heads up... I'm going to share everything with you... so read carefully...

First, you have got to know that "Cryptocurrency is the new "Goldrush"

And it isn't going away any day soon.

In fact, this simple and easy money making opportunity has only just begun. It's about to really explode in the coming months and that's why if you really want to make some serious money very quickly, like I did... **you need to get involved like right now!**

Forget everything you might have heard already about Bitcoin because in just a moment I'm going to tell you straight off the bat exactly how this crazy techno-currency works and how you can grab a slice of the action.

I'm not going to hold anything back and believe me, there's nothing in it for me other than the satisfaction of knowing that I can help other people realize their dreams, just as I have.

Any Average Man or Woman Can Make An Easy \$15,000 - \$20,000 a Month Trading Bitcoin

So, what's all this about Cryptocurrency? Well, unless you've been living on a desert island for the last 10 years, cryptocurrency such as Bitcoin is a digital currency that is not controlled by any banks.

Look guys, I don't really want to go into all the technical details because it can become very complicated when trying to explain the details but it's really **NOT complicated** to learn how to trade a cryptocurrency.

Or just buy it!

When it first appeared, nobody knew what Bitcoin really was and then gradually a few people learned about it and then a few more and since then it has slowly but surely gained in popularity... and so as it became more widespread its value began to increase...

Dramatically!

As its value has steadily increased it can now be traded like any other currency and that's where fortunes are quickly made.

Now get this...

Fact: If you had invested \$100 in bitcoin in 2011, by December 2017 it would have been worth \$6,594,267

Over six and a half million dollars!

The value then began to drop in 2018 only to begin rising again early this year **and it's still rising!**

Now, anyone who has a small amount of cash to invest can buy any of the 1600 or more cryptocurrencies and trade them for **BIG profits** or just wait and take a profit from the hike in value.

I always tend to refer to Bitcoin as my favorite cryptocurrency because it has been around the longest, actually it was the first, but other cryptos are doing quite well too now.

Based on what I now know, it's realistic to expect to make at least \$500 a day. YES! A DAY! Regardless of your knowledge or experience of trading Bitcoin.

How do I know all this?

Here's how my life changed forever...

Okay, so my boss asked me to look into the whole crypto thing right?

And like I said, I did. But what I found absolutely blew me away.

I remember how excited I was when I sat Mike down and explained all the details to him. Of course with him being involved in Finance he immediately saw the opportunity for what it was.

What's more, and without his knowledge I tracked Mike's \$2,000 investment and watched it grow into \$3,200 in just 72 hours.

It then slowed a little but by the end of the week his initial \$2,000 had grown to \$5,846. That's a whopping \$3,846 profit or as I prefer to see it, 192.3%.

Man I was totally buzzing. Over the next few weeks I watched his \$2,000 investment grow to well over \$19,000. Now I wanted in... **I desperately wanted a piece of the action.**

But then I got hit by a proverbial bombshell

I got fired!

Yep! Mike discovered that I had been snooping on his crypto account and I was given my orders to leave. I didn't argue with him, I just went.

I wasn't at all worried because I still had all the knowledge locked up inside my head and I soon began to put it to work.

Next day, I maxed out my credit card by buying \$700 of Bitcoin and I began trading. It was like second nature to me, the numbers just looked so favourable and I couldn't help myself.

I began trading twice a day, at just the right times and within my very first week I had turned my initial \$700 into \$2,320 making a profit of \$1,620 or 231%.

It was like winning the lottery only this was not just a one off...

I could have just sat on the money and done nothing and I would still have made a nice profit but by trading, **I was raking in like 10 times more.**

The following next week I could afford to invest more so I traded \$1,500 and made a clear 203% profit or \$3,050. Can you imagine how I felt?

This was better than any drugs, any alcohol and any sex... well maybe not that bit.

I was now hungry to make a killing. I kept thinking this was just too good to be true, something is going to happen and I'll lose everything or my profits will suddenly stop dead.

I was sure it just couldn't go on for much longer before everything came crashing down.

It didn't and I just carried on making more and more money... Compounding my investments and my profits every day.

I was more than happy to keep going for as long as I could get away with the huge profits I was making.

I made money day and night...

For weeks I traded every day and every night. I had virtually cut myself off from the outside world. It was just me and my laptop in my messy

one room apartment... making excessively, obscene amounts of money like I was sucking it up out of a well or it was like some kind of cash cow.

I mean I was milking this for everything I could get. Well, wouldn't you?

Finally, I had to slow down. I had to come up for air and try to get back to some kind of normal life. I mean I hadn't eaten or taken a shower in days and I was so tired.

A quick count after 16 days of hectic trading confirmed that I had made an incredible **\$101,336 in pure PROFIT!**

I decided to take a break and treat my girlfriend to a new car. After all, I wouldn't have had this **once-in-a-lifetime** chance if it hadn't been for her getting me the job at her office.

She loved her new car and it bought me some more time to "play the game". And that's how I considered it. It was like I was playing some kind of game, in which I couldn't lose.

So, I was soon back trading only now the profits were not quite so good. Still huge by any stretch of the imagination but not like 200%, more like 60-70%.

Then over the next few weeks the values and profits went up and down but I never lost.

I always made a profit...

It was only much later that I found out that the cryptocurrency markets were going through a meteoric rise in value. This was all back in December 2017.

Since then the values have dropped and risen much more slowly. The fact that more hybrid cryptocurrencies have come into play, has had a stabilizing effect but even the other cryptos like Litecoin, Ethereum and Dash offer worthy investment opportunities.

After such hectic trading I was now happy to just buy various currencies and wait for their value to rise, which they did. So you see, you can even make big profits without doing anything at all.

Okay so fast forward to right now and I have made well over £2 million from cryptocurrencies.

Hell yeah!

Now it's your turn!

Ready to make serious cash profits?

Okay, now like I said at the beginning, there's no real life-changing financial gain for me in offering you this opportunity but if you're willing to follow my advice and my instructions then you could be sitting pretty just like me in maybe a year or even much less.

I say "much less" because I have heard that another big rise in value is coming and so you need to be well placed if you want to cash in.

I don't know if it will go ballistic like last time but I'm getting primed for more profits, I mean like maybe another million dollars, if it happens.

Everything you need to know is in my ebook...

Book image

And get this!

I can now trade on my phone from anywhere in the world!

So what do you have to do to join me?

Simple... Just buy my ebook and read everything I have written about cryptocurrencies and how to make money. It's all in there... everything.

The only cost is \$20 and that's just to help cover the costs of keeping this website up and fully maintained. See, I told you there wasn't anything in it for me.

Just 20 bucks gets you in!

I've made my fortune already and now it's time for you to go ahead and make yours.

So are you ready to do that?

Then go [here](#) right now. Don't delay.

Remember the next big rise in value is about to happen at any time but it will be soon and you could miss out if you don't act now.

My advice is to don't try to figure it all out by yourself.

Sure you'll save a measly five bucks but with my advice and the goldmine of information I have waiting for you, you could cream off a fortune in next to no time at all.

Exactly how much?

Well, I'd love to be able to say exactly how much but with fluctuations in values, and because I don't know whether you have any previous experience of cryptocurrencies, I'll stick my neck out and say at least **\$500 a day.**

Would \$500 extra every day help you?

How does that sound?

That amounts to around \$15K a month or \$180,000 a year. Could you live with that?

And we're talking about maybe one or two hours of your time each day if you want to trade or just a few minutes if you don't.

Could you can handle that?

A no-brainer right?

Before you decide, see what John said just 2 weeks after he bought my ebook.
