

*“At age 24 I became a millionaire almost by accident...
Now I plan to become a billionaire by design”*

If You Really Want To Become Seriously Rich Then Simply Follow My Blueprint For Unlimited Wealth Creation

This new emerging market is set to make ordinary people super rich... and if you want to know how it can make YOU rich...

It starts right here...

VIDEO

Hi, I'm Dylan Verma and I'm a multi-millionaire.

In just a moment I'm going to explain how you too can become **seriously super rich**... but only if you're prepared to jump on this emerging opportunity that is heading your way over the coming months.

Now, some might say I became rich by accident and I would definitely agree that I struck lucky by being in the right place at the right time.

Everyone needs some luck sometime.

Yeah... I know some people say you can make your own luck but I don't believe that works for everybody. I think you need to be presented with an opportunity and then exploit that opportunity right there and then.

You need to seize the moment... make things happen...

That's what I did... and it worked for me

I just happened to be working in an office, filing invoices, when I noticed an **opportunity** to make some quick and easy money.

If I hadn't had been there at that precise moment in time then I might still have been clearing tables at a nearby Pizza joint.

I'm not kidding...

And I'll always be grateful to my girlfriend for getting me the job that led to me working in that office... even though I got fired.

And that's a whole different story... (You can read about it here. <https://www.bitcoin-millionaires.club>)

Looking back, it was a series of fortunate events that eventually contributed to my unexpected wealth.

I just responded to my opportunities in a positive way and... sheesh!...

I sometimes have to pinch myself because I still can't believe my life and my good fortune is for real.

How I became very rich...

You see, I went from dead broke to millionaire by trading Bitcoin.

And I did it in just over a year... well, in about 14 months to be precise.

I'd heard about Bitcoin and Cryptocurrencies before but I didn't really take any notice. It just wasn't something I was that interested in.

One very important lesson I learnt right there was... if you want to make money you should be interested in EVERYTHING!

By that I mean everything that can make money for you. Everything that comes your way by chance or by any other means.

Opportunities are everywhere ... you just got to keep your eyes and ears alert to them.

So, why am I telling you all this?

I'm telling you because a new opportunity is coming... it's NOT Bitcoin and this is your heads up.

Now you might be thinking... why the hell is this guy, who I don't know from Adam, telling me about money making opportunities?

Don't read any further unless you're serious about making money...

Well are you? Okay, well listen up...

I've already made a lot of money and I'm living a great life. I feel I've been blessed and so I want to help others make money... that's if you want to!

Listen! It's no skin off my nose whether you take my advice or not. But I'll tell you right now...

Nobody else is going to share this information with you so look at this as YOUR opportunity... right?

Remember I said opportunities are everywhere... **well here's yours... right here and right now.**

If you make money from it, which you will, it won't affect me one iota. In fact, I'll be making tons of money from it regardless of whether you jump in or not.

All I ask is that you hear me out and then decide for yourself whether you want to make a small fortune like I have.

Now this new emerging opportunity is NOT Bitcoin, although there's a ton of cash to be made from cryptocurrency (You can read about it here. <https://www.bitcoin-millionaires.club>)

No, this about something much more lucrative!

This is how it all began for me...

So before I tell you more, I just want to let you in on how I discovered this new opportunity...

My close friend Lennie knows all about how I became rich because I helped him become rich too by showing him exactly what I did.

It's real easy to make money when someone who knows how to do it shows you right?

Okay, so Lennie has an uncle who lives in Idaho and this guy is like seriously ill... I mean like dying from an incurable disease.

I don't want to say what it is exactly because it's a word I really hate. It frightens me... it took someone really close to me a few years back...

Anyways...

So Lennie's uncle, whose name is Harry, was in constant pain and no matter what medication the doctors gave him... nothing helped ease his misery. The poor guy was just suffering each and every day.

I can't think of anything worse than that... but I don't want to dwell.

So, the next thing I hear is that Lennie's cousin, Mia, goes visit Harry and takes him over some Marijuana... weed... cannabis.. grass... call it what you will.

Now Marijuana, even the medicinal kind is illegal in the state of Idaho, so she was taking a big risk. But she wasn't worried about that... she's a real tough cookie is Mia, and real brazen-like too.

Now this is what happened next...

Mia showed Harry how to brew the Marijuana like a tea and then drink it. So, just 2 days later Harry is up and walking about smiling and joking with his neighbors.

His neighbors think he's on drugs... well he is... right?

Harry tells Mia the pain was still there but now it's bearable and manageable.

Well, when I was told this story by Lennie I thought...Holy shit! Is this for real?

I became really sceptical about this story but then I thought why would Lennie make all this up?

A few days later, and out of morbid curiosity I guess... I suggested to Lennie that we go pay his uncle Harry a visit to see how he's getting on.

Lennie was really up for it so I said we'd drive over in my Corvette ZR1 and take in some scenery along the way.

It was about time I took my new car for a long run...

Harry lives in a small town called Preston, which is located in Franklin County. So from my apartment in LA to Preston is around 800 miles and I figured about 12 hours driving time.

We stopped over in a motel in Salt Lake City, Utah, for one night as I was really tired and hungry and I was desperate for a cold beer.

Later next day, we arrived at Harry's place and we were greeted with the warmest welcome you could imagine.

Harry has lived alone since his wife died some 6 years ago but he has managed to keep the place surprisingly clean and tidy.

I was really impressed by this old guy's attitude to life and even more so about how he was, regarding his medical condition. Real matter of fact...

We talked for hours about all kinds of stuff and Harry was really interested in our opinions.

He thought I was a Red Indian Native...

We also had a really good laugh when he asked me whether I lived on the reservation.

He first thought that I was a native Indian but when Lennie explained that my parents were second generation Asian Indian, he couldn't stop laughing at his mistake.

I'm still laughing about that now...

Well what would you think?

Photo of Dylan	Minus head dress But laughing aside... ...there's a more serious aspect to this story... That is... A BIG opportunity. There it is again... that word... "OPPORTUNITY" .
----------------	---

So, I had now seen for myself how someone with a crippling and painful illness can gain some very beneficial relief from a substance that was until recently outlawed in most US States and in many European countries.

What does that tell me?

Times they are changing my friend.

Marijuana, or at least the medical kind, is fast becoming an acceptable solution to pain control.

And here lies the opportunity...

There must be millions of people all over the world, just like old Harry.

Think about that for a moment!

MILLIONS OF POTENTIAL CUSTOMERS RIGHT?

We are talking about a mega-size market here!

How the hell this has ever come to be, especially with the pharmaceutical companies and the power they yield, is beyond me.

I still needed some more convincing and so I carried out some real serious research...

And here's what I found...

Now listen up guys... because this is why you should be thinking about cutting yourself a slice of the action...

The lowdown on medical Marijuana...

These are the facts...

- Marijuana contains over 100 chemical compounds called Cannabinoids, which when ingested or inhaled, affect the brain's receptors and nerve cells. This can then slow down the affects or the sensations of pain. So in other words, it's a powerful pain reliever.
- Medical Marijuana is based on a number of Cannabinoids, which have been selected to help with conditions like pain relief, epilepsy, anorexia, nausea associated with chemotherapy and muscle spasms. And that's just for starters. There are many other medical conditions that it can treat but which have not yet been fully explored or medically confirmed.

Okay, so those are good enough reasons to take the drug medically should you need to... right?

Now get this...

- At the time of writing, 33 US states have legalized the use of medical Marijuana and others are considering doing so. Add to that Canada, Argentina, Australia, Chile, Columbia, India, Germany, Israel, Italy, Mexico, Poland and a whole host of other nations, who have legalized its use. With many more now considering.

So what does this mean?

It means money dude!

Plain and simple... it's the biggest opportunity since oil was discovered at Oil Creek, Pennsylvania way back in 1859.

Yes! This is going to be bigger than the California Gold Rush of 1848... and that's very significant.

Why?

Because the people who made the most money from the Gold Rush way back then were not those who got their hands dirty digging for gold.

It was the hardware stores who sold the shovels!

That's right! These guys saw an opportunity and rose to the challenge. Back then you couldn't make shovels fast enough, such was the demand.

In effect, the store holders made money on the back of the Gold Rush... right?

So, anyone who gets involved in the **Great Marijuana Medical Money Making Opportunity** right now, will not need to get their hands dirty but could cream off millions in profits by investing in this huge... well... **opportunity**.

In other words they will get filthy rich off the back of this new emerging "Gold Rush", "Oil Gusher" or call it what you will.

When I first realized the potential of this opportunity I got to work researching and working out the figures.

Oh.. I forgot to mention that I'm pretty damn good with figures. I studied Math at University and although I dropped out I can still work out complicated mathematical calculations and analyse statistical data.

Yeah! I'm not just a pretty face! 😊

Okay here are some serious numbers for you to consider...

- The LEGAL cannabis industry was valued at **10.4 Billion Dollars** in 2018. And that's just in the US alone!
- Globally, it's said to be worth around **17 Billion Dollars** and expected to rise to **31.3 Billion Dollars** by 2022.
- According to Grand View Research, Inc, the legal Marijuana market is expected to be worth a staggering **66.3 Billion Dollars** by 2025.
- Experts say the European cannabis market will be worth **132 Billion Dollars** by 2028.
- Some of the more optimistic forecasts suggest that the world is witnessing the birth of an industry, which could be worth somewhere from **500 Billion Dollars to 1 Trillion Dollars**.

Now, I'm not usually fazed by big numbers but these numbers got me pissing my pants... if you'll pardon my expression.

I mean... when your calculator runs out of space because there's no more room for numbers, you have just got to try and put everything into perspective.

I mean, try putting the figure one trillion into a calculator and you'll see what I mean.

Here's what it looks like written down...

\$ 1,000,000,000,000

These are giddy numbers but let's just step back a minute and take stock...

Let's deal with numbers we can handle... numbers we can deal with and understand...

So, the year is currently 2019, and the legal medical cannabis market is currently worth around **\$17 Billion**.

Hell that's still a huge number but we have to live with it... it's a fact.

How much is the market really worth to you and me?

What we really need to know is at what **percentage** is the value of the market expected to rise.

Well, according to experts and based on previous values and taking into consideration previous percentage rises and all the other states and countries that will legalize the stuff...

I was able to come to the conclusion that Compound Annual Growth Rate (CAGR)... that's a term used by business to determine a constant return over any given time period... Will be **23.9%**.

Hell it could be double that... the forecasts keep changing almost daily!

Okay, safe to say that if you invested now you could expect between 16% and 24% return on your investment in the short term.

Or... compounded interest could be around 55%-60% over the next 5 years.

These are all staggering numbers and you don't really need to be a savvy investor or a high flyer to make money off of this... **anyone can!**

Confused about numbers and percentages? Check this out!

If you're one of those people who gets all confused about numbers and percentages then don't worry...

Here is some good news for you that's real easy to figure out...

Some of the Marijuana companies are beginning to issue IPOs.

That means Initial Public Offerings. They are what's known as penny stocks or penny shares and they are usually available for around 50 cents each.

I bought some myself... 😊

But anyone who bought them at that price say a year ago, will have now seen the value rise by **around 500%**. That means every 50 cents invested then... is now worth 3 dollars.

So imagine if you invested say 1000 dollars. That would now be worth 6000 dollars.

If you're a savvy investor then you will see the potential right away.

It's a dead-cert opportunity... an opportunity to get in now and make an absolute killing on the global markets, where percentage rises could be even more... **a hell of a lot more.**

Need some guidance or advice?

What if you had a step by step guide to help you?

I made my millions with Bitcoin and then I helped many more people make some crazy money by writing a guide for them to follow.

The guide was simply telling the reader how I made my money and what they had to do if they wanted to do the same as me... **it's just simple step by step information.**

Basically, it's a simple instruction guide that is working just as well now as it did when I first wrote it, which was just a few months back.

I seriously think it will continue to make many people rich for years to come.

Anyways, as I've now started to invest in this new Marijuana market, I've written a guide for this **opportunity** too.

I've already made a small fortune from Marijuana and I know you will too if you follow my advice.

I've called the guide "**How The New Marijuana Market Will Make You Rich**"

IMAGE OF BOOK

Yeah, I know it's a long title but it explains exactly what it says. You **WILL** get rich if you simply follow the steps I have laid down for you.

I have made it real easy to follow and I haven't written any jargon or any of that techie speak stuff. I didn't want to exclude anyone on this **OPPORTUNITY**.

Now you don't even have to take my word about the new emerging Marijuana market opportunity... just Google it and see for yourself.

The predictions are all there for anyone to see.

So my advice to you my friend is if you want to make money and become rich... maybe a millionaire or even a billionaire...

Just get this guide now...

It's your choice. There's no hard sell tactics here...

It really doesn't matter to me whether you do or don't buy a copy of my guide because as I've said all along, I've already made millions of dollars and I expect to make a lot more with my Marijuana investments.

However, do you really want to miss out on such a huge, maybe once in a lifetime opportunity? This guy didn't...

TESTIMONIAL

So, do you really want to be looking back in a few years from now wishing you had taken the opportunity when it came your way?

I wouldn't be here right now talking to you if I hadn't seized the day and exploited the opportunity that came my way... when it did.

I wouldn't be living in my luxury Penthouse apartment in LA with my gorgeous girlfriend, and driving my favorite car, taking vacations whenever I want and not having to answer to anyone.

That's what opportunity can bring... so don't miss this one.

Just buy a copy of my guide today and begin a new chapter in your life.

It's only 20 bucks... hardly worth worrying about and at that price would never make me rich... **it's the information that makes people rich.**

Like the shovels of the past...

It's the knowing... it's the knowledge that can make you very rich.

Come on... let's all get high on success!
