

## **Video VO script – Evoteg**

Imagine a company that grows and thrives on innovation...

A modern company that shares a passion for smart technology and digital transformation...

A state-of-the-art company with a clearly defined vision of the future...

A solution provider... a driving force... a pathfinder.

Welcome to Evoteg, a company that not only supports and embraces the digital revolution, it also creates and delivers high quality, next-generation technologies and state-of-the-art ICT solutions.

As the digital future unfolds, more than 2.3 billion US dollars is expected to be invested in smart city technologies within the MEA region over the next 2 years.

Within the next decade, AI is expected to impact the Middle East economies to the tune of 320 billion US dollars.

Data center spending is estimated to hit 5.1 billion US dollars within the next 12 months and cloud computing is destined to create more than half a million new jobs throughout the MEA region by 2022.

Technology marches on...

Evoteg is the region's most reliable and trusted technology partner providing ICT solutions and support for businesses, governments and local communities.

Together, with some of the world's most foremost technology providers including Microsoft, Oracle, SAP, IBM and Johnson Controls, we can deliver a seamless city-wide digital transformation.

We focus on delivering quality Smart City and IoT Services, Business Applications, Platform and Cloud Services together with Infrastructure Services.

Through our Smart City and IoT Services, we are enabling sustainable development, providing smarter and secure living for people in the region.

We provide building management systems and smart grids and meters that communicate energy consumption in real-time.

We provide smart transport solutions that feature vehicle tracking and parking to ensure a better quality of life.

We provide a wide range of cloud-based, smart health solutions that digitize and streamline the healthcare industry.

We are implementing core ERP & CRM business and finance applications, utilizing Machine Learning capabilities.

We are developing Human Capital Management & procurement together with SW security solutions, mobile development services and e-commerce services.

Together with Platform as a Service and Software as a Service, Digital Vault platforms for secure cloud-based storage and Track & Trace platforms for real-time monitoring plus Smart City platforms for better infrastructure management.

We are providing a host of Data Center, application, IT outsourcing, Infrastructure and fully managed services including G Cloud, Data Platforms and Smart Platforms.

We have introduced the UAE to some of the region's most captivating projects including the largest municipal digitization project in the GCC for the Sharjah Municipality together with deploying Sharjah's first blockchain platform for the Hamriyah Free Zone Authority.

And... UAE's First Fully AI Integrated Office Building for Bee'ah's new headquarters

Evoteq... turning imagination into digital realization for the Middle East.
